

## Course details

### Course title

Schools, Parenting and Child Development: Health and Safety in a Learning Environment

### Course code

Q00015652

### Course date

Start: 19/09/24

End: 24/10/24

### Number of classes

6 sessions

### Timetable

Thu 19th Sep, 13:00 to 15:00

Thu 26th Sep, 13:00 to 15:00

Thu 3rd Oct, 13:00 to 15:00

Thu 10th Oct, 13:00 to 15:00

Thu 17th Oct, 13:00 to 15:00

Thu 24th Oct, 13:00 to 15:00

### Tutor

Kailash Parekh

### Fee range

Free to £44.40

### How you'll learn

You'll join a small group of fellow learners for classes online in video meetings and materials will be provided in our virtual learning environment.

Beginners

**Course overview**

This course is designed to help you provide evidence of the knowledge and understanding required to support children and young people's health and safety in a learning environment. This comprehensive, non-accredited course equips educators, administrators, and support staff with essential health and safety skills tailored for educational settings. Through interactive sessions, real-life examples, and practical guidelines, attendees will gain the knowledge to create and sustain a secure learning space. Ideal for anyone involved in school or daycare management, this course emphasizes proactive measures and compliance with current safety standards to ensure the well-being of students and staff. This course is funded by the West Midlands Combined Authority.

**Course description**

This dynamic, non-accredited course is designed for educators, administrators, and support staff to master the essential health and safety protocols within educational settings. Participants will learn to identify and manage potential risks, ensuring a safe and productive learning environment. Participants will identify and list three common hazards, such as slips and falls, electrical hazards, and exposure to infectious diseases, emphasizing their impact on students and staff. The course will outline five critical legislative points, including the Health and Safety at Work Act, the Management of Health and Safety at Work Regulations, and the requirements for risk assessments, ensuring compliance and awareness of legal responsibilities. Attendees will learn the correct procedures for reporting various emergencies, including detailed steps for documenting accidents, incidents, injuries, and signs of illness, to foster a prompt and efficient response in critical situations. The program will cover three factors vital for planning safe environments, such as ensuring adequate supervision, maintaining clean and secure facilities, and regularly inspecting both indoor and outdoor areas for potential hazards. Finally, participants will explore the importance of a balanced approach to risk management, focusing on the need to create safe yet stimulating environments, allowing for the healthy development of children while mitigating excessive restrictions that could stifle learning and exploration.

**What financial support is available?**

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

## **What other support is available?**

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
