E

## **Course overview**

Improve your English skills for maths with our Entry Level ESOL: English for Maths course. Develop the language needed to understand and apply mathematical concepts. Ideal for non-native speakers looking to enhance their maths and English proficiency.

## **Course description**

Entry Level ESOL: English for Maths is designed to help non-native English speakers improve their language skills specifically for understanding and applying mathematical concepts. This course covers essential vocabulary and phrases used in maths, ensuring that participants can follow instructions, understand mathematical terms, and solve problems accurately. Participants will engage in interactive activities and practical exercises that integrate English language learning with mathematical tasks. The course includes lessons on basic arithmetic, geometry, and problem-solving, with a focus on using English to explain and understand these concepts. By the end of the course, participants will have improved their maths and English proficiency, enabling them to succeed in further maths education and everyday mathematical tasks. This course is ideal for non-native speakers looking to enhance their maths and English skills for academic and practical purposes.

## **What financial support is available?**

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need.

## **What other support is available?**

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss

this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
