## **Course overview**

Improve your English skills for health-related contexts with our English for Health course. Develop the language needed to understand and communicate effectively about health and well-being. Ideal for non-native speakers working in or studying health-related fields.

## **Course description**

English for Health is designed to help non-native English speakers improve their language skills for health-related contexts. This course covers essential vocabulary and phrases used in health and medical settings, ensuring that participants can communicate effectively about health and well-being. Participants will engage in interactive activities and practical exercises that integrate English language learning with health-related topics. The course includes lessons on discussing symptoms, understanding medical instructions, and communicating with healthcare professionals. By the end of the course, participants will have improved their English proficiency and be better prepared to work or study in health-related fields. This course is ideal for non-native speakers looking to enhance their English skills for health and medical contexts.

## **What financial support is available?**

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

## **What other support is available?**

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
