Beginners

Course overview

Disease is always with us but few of us realise the impact diseases have had across history. This course will open your ears, eyes and minds - a bit at least.

Course description

The course looks at how diseases have had an effect history. It considers a series of diseases against their social political and intellectual framework. We will look at the impact upon key individuals thus changing the course of events, or upon large numbers such as the Black Death, or even whole populations (the Aztecs) . Our overview will cross several centuries and include consideration whether disease decided the outcome of Napoleon's Russia campaign of 1812.

What financial support is available?

We don't want anything to stand in your way when it comes to bringing Adult learning within reach so if you need anything to support you to achieve your goals then speak to one of our education experts during your enrolment journey. Most of our courses are government funded but if you don't qualify or need alternative financial help to access them then let us know.

What other support is available?

All of our digital content, teaching and learning activities and assessments are designed to be accessible so if you need any additional support you can discuss this with the education experts during your enrolment journey and we will do all we can to make sure you have optimal access.
